

PACKING AND SHIPPING INSTRUCTIONS

Contents

- Packing & Shipping Instructions
- Numbered Protective wrapping sleeve 2 pockets per sleeve
- Order form & Suggested Sharpening Guide
- Return mailing label

FIRST Make sure all the information on the top portion of the order form is correct.

The packing instructions will require you to pick a profile and angle for each knife. The back of the order form has a list of suggested profiles and angles and our website details how profile and angle affect sharpness and edge life. You can choose V-Edge or Convex for any knife and any angle between 10° and 35° Most people use our suggested profiles and angles by filling in As Suggested.

Place your first knife in the sleeve marked #1
Fill in the required information for Knife 1 on the order form

Place the second knife in the sleeve marked #2
Fill in the required information for knife #2 on the order form
Fold the sleeve in half and place in box.
Repeat this process until all your knives are in the box.

Before sealing the box, make sure that the ORDER FORM is included and that any void space is stuffed with filler (crumpled newspaper will do). The knives should not be allowed to rattle around as they can chip if they hit against each other. If any poke through the box, the carrier may refuse to deliver.

Attach the pre addressed mailing label to the box and bring to the shipper of your choice. We recommend that you insure the knives for their actual worth.
